ABOUT US

NILKAMAL LIMITED, a **Rs. 1843.37 crores (US\$ 307 million)** [(F.Y. 2012-13) as on 31st March 2013] company is into manufacture of molded plastic material handling crates and furniture. We are a Public Limited company listed on the Bombay Stock Exchange. Supported by sales network of more than 400 sales personnel operating through over 51 regional offices and 39 warehouses across India. We are truly **A One Stop Shop For Material Handling Solutions**.

Our portfolio of products manufactured & marketed includes the following:

- Plastic crates & pallets
- PP Corrugated Boxes
- Textile Partition Packaging for scratch sensitive products
(JV with ConTeyor Multibag Systems NV, Belgium)
- Storage systems in metal (Mfg JV with BITO Lagertechnik Bittmann GmbH of Germany)
- Exhaustive range of Material Handling Equipments
- Forklift Trucks & Warehousing Systems from Mitsubishi Forklift Trucks
- Very Narrow Aisle Forklift Trucks that maximize warehousing space from Aisle Master - the leading international brand of VNA trucks.
- Specialised forklift trucks for long loads and Multidirectional movement from CombiLift.
- VNA Man Up turret trucks for order picking in high density warehouses from Magaziner.
- Vacuum Lifting equipments from Vaculex
- Automated Vertical Storage & Retrieval Systems from Hanel, Germany
- Road Safety Products
- Insulated Boxes
- Insulated Fish Tubs
- Pre fab construction
- Fruit ripening chambers and cold storage
- Floating fish cages
- Underground drainage systems
- Waste Bins – Mfg roto moulded waste bins and marketing EN 840 Compliant Waste Bins from Plastic Omnium, France. Well accepted across progressive civic bodies across India.

Apart from material handling, we are India's No 1 manufacturer of plastic chairs and plastic furniture. We have also successfully ventured in home décor retail segment with our own signature store chain across major Indian cities - @home, having over 19 stores each with an approximate area over 20,000 Sq ft per store.

We have a joint venture with **CAMBRO Mfg. Co. USA** now for a significant presence in the Food & Beverage Service Business for the Hospitality Industry and count India's best Hotels and kitchen services amongst our established customers.

Manufacturing strength – 9 Global scale factories across India, all ISO 9001:2008 Certified.

INJECTION MOLDED (SERIES) CRATES :

Nilkamal pioneered the use of Plastic crates in India and has maintained leadership position in the Indian market. Innovation, a proactive approach to customer needs has led us to offer the widest range of molded plastic crates in the Indian market, catering to practically every user segment and also creating some in the process. No wonder that we count the best and most demanding names in the Indian Industry amongst our established customers. This section gives extensive information on our range of Injection Molded Crates (also known as Series Crates) for various industries. You will find detailed lists of models and respective versions along with their outer and inner dimensions that would help you make your buying choices easier.

JUMBO CRATES

All Crates are made from Food Grade HDPE.

Nilkamal Ltd., India's leading manufacturers and pioneers in the field of material handling crates offer a wide range of high capacity storage crates. Our **Mini Jumbo, Jumbo, Maha Jumbo and Double Wall Jumbo Crates and Giant crates** are ideal for a variety of storage applications across Industries. These crates are made from hygienic food grade HDPE and are ideally suited for handling food products also. Light weight and easy to wash and clean, they are rust free and maintenance free. High volume, high capacity; ideal for storage and transportation in bulk and heavy duty applications.

GIANT CRATES

All Crates are made from Food Grade HDPE.

Storage needs have grown with the growth in Industry and **Nilkamal** has always provided the right product to match. Our **GIANT CRATES** are a perfect solution to large storage needs. Made from food grade industrial HDPE, they are easy-wash, easy-clean, rust free and do not require maintenance. Easily stackable and also allow sufficient ventilation. **Nilkamal's Giant Crates** have a huge capacity of 163 litres, equal to nearly 8 smaller crates. It is an excellent choice for dumping fruits, flowers or vegetables. Ideal long lasting replacement for traditional cane / wooden or cloth lined crates for farms, nurseries, grading godowns or cold storages etc. Can also be fitted with wheels (optional) for easy mobility.

CONDUCTIVE CRATES

Nilkamal Conductive crates are made from specially permanent blended raw material which prevents or dissipates electric charges. They are highly recommended for the industries which are handling and using highly sensitive electronics components. The excellent characteristics of the material are highly regarded in Electronics / Electrical / Mechanical Engg., Data Processing, Mining Ammunition & in explosive manufacturing industries. All types of packaging & handling equipment manufactured, gives the necessary protection, particularly for modern electronic components, complete modules and assembled printed circuit boards & other static sensitive devices (SSD). Nilkamal has a wide range of crates, PCB holders, PCB crates, Injection Molded crates, lids & FPO crates.

Basic Material : Polypropylene Copolymer (PPCP) • **Conductive Additive :** Carbon Black • **Color :** Black • **Working Temperature :** Approx. 80-90°C(Continuous) , Approx. 100-110°C (Short Term) • **Surface Resistance :** $\leq 10^4$ Ohms cm • **Volume Resistance :** $\leq 10^5$ Ohms cm • **No Migration of corrosive substance** **Aging Behavior :** No Degrading of Conductivity Outstanding Ultraviolet Resistance

ACCESSORIES

NILKAMAL brings three decades of experience into designing plastic accessories which enhance the value of the crates in a speciality / dedicated application otherwise difficult to achieve. Standardising these accessories has helped in giving economic & quick solutions to the customer's Material Handling Problems. We are sure that these accessories will give you a perfect solution for your needs.

MAINTENANCE PRODUCTS

WHEELS & CASTERS :

Reliable and high quality caster wheels are essential for smooth movement of goods on shop floors, warehouses as also many other applications. Nilkamal offers a wide range of caster wheels that work under taxing conditions.

Salient features are:

- Works in a wide span of temperature from -20° C to 85°C.
- Sizes from 3" to 8" dia
- Available in PU with cast iron core, Thermoplastic rubber (TPR) , PVC as well as Nylon (black)
- Types : Fixed, Swivel and with ball bearing. Brakes optional.

UC Fixed Caster 5", 6", 8"

Swivel Caster with Break 5", 6", 8"

Nylon Caster 6", 8", 10" & 12"

Bracket surface finish – Corrosion Resistant ZN – Galvanized Zinc Finish, Top plate & fork legs made of 1/4" cold forged steel. Case hardened double ball raceways provide extra strength & durability.

MODULAR CRATES & RACKS :

Modular storage crates and Electro Conveyance Crates are widely used in Electronics and Electrical industry for storage and movement .

Model : HMTR
(Horizontal format with modular storage crate 275 / 300)
O.D 910 (L) X 320 (B) X 615 (H) MM.
(Also available without castors)

Model : VMTR
(Vertical format with modular storage crate 275 / 300)
O.D 500 (L) X 320 (B) X 1110 (H) MM.
(Also available without castors)

MODULAR STORAGE CRATES

MODEL : 300 With Removable Partition
With 3 Partitions & 4 Pockets
(Also available **Model : 200** with 1 partition & 2 pockets)

ELECTRO CONVEYANCE CRATES

MODEL : ECC12
Box Size : 230 (L) X 164 (B) X 154 (H) mm.
Drawer Size : 149 (L) X 72 (B) X 31(H) mm.

MODULAR STORAGE CRATES & MODULAR STORAGE RACKS :

MODEL : CC8080
O.D. : 80 (L) X 80 (B) X 31 (H) mm.

MODEL : CC16080
O.D. : 160 (L) X 80 (B) X 31 (H) mm.

(Each rack can accommodate 24 trays respectively.)

RETURNABLES FOR REVERSE LOGISTICS

Nilkamal pioneered the use of Plastic crates in India and has maintained leadership position in the Indian market. Innovation, a proactive approach to customer needs has led us to offer the widest range of molded plastic crates in the Indian market, catering to practically every user segment and also creating some in the process. No wonder that we count the best and most demanding names in the Indian industry amongst our established customers. This section gives extensive information on our range of Injection Molded Crates (also known as Series Crates) for various industries. You will find detailed lists of models and respective versions along with their outer and inner dimensions that would help you make your buying choices easier.

Pl. decide first about pallet foot-print . Check you need Roto molded pallet or Injection Molded pallet. This chart does not indicate pallet performance. For Roto Molded pallet refer our separate detailed brochure. Before finalizing any design, consider available MHE, Racking system, type of goods. Take Nilkamal advise for Optimizing pallet design & available colour scheme. All details subject to change without notice. We can supply selected foot-print mild steel powder coated pallets, hot dip Galvanized pallets & Wire mesh cage.

Please refer separate brochure for our Injection Molded Pallets, Roto Molded Pallets & Wire Mesh Pallets

INJECTION MOLDED PALLETS (MODEL : AP - 1210)

- Fail-safe, anti-skid perforated design. ● Suitable with all kinds of Material Handling Equipments & all conventional racks like Pallet Storage Systems, Drive-In Rack & Also ASRS Double Deep Racks, Shuttle car etc. ● Best for use as returnable pallets with unmatched durability for all purpose heavy industrial applications. ● Can withstand heavy point loads and heavy temperature variations. ● Products are protected from rolling, pitching, yawning, heaving, swaying and surging during crude conventional internal and external handling, inland or ocean transportation. ● Truly All Purpose Pallet.

Compatible MHE :	
Equipment	Refer to Page No.
Electric Stacker	XXX
Electric Reach Stacker	XXX
Electric Reach Truck	XXX
Forklift	XXX

Small side (1000 mm) open entry suitable for all MHE. Long side with Restricted Entry suitable for Forklift, Reach truck. Recommended wider fork spread for better stability during lifting, moving, shifting load as dynamic use.

Eliminate the packing material waste, scrap filling around. Use Nilkamal load retaining Lashing Belt & Lashing PP ordinary ropes with Buckles. Save on using Reusable Load Retaining Straps.

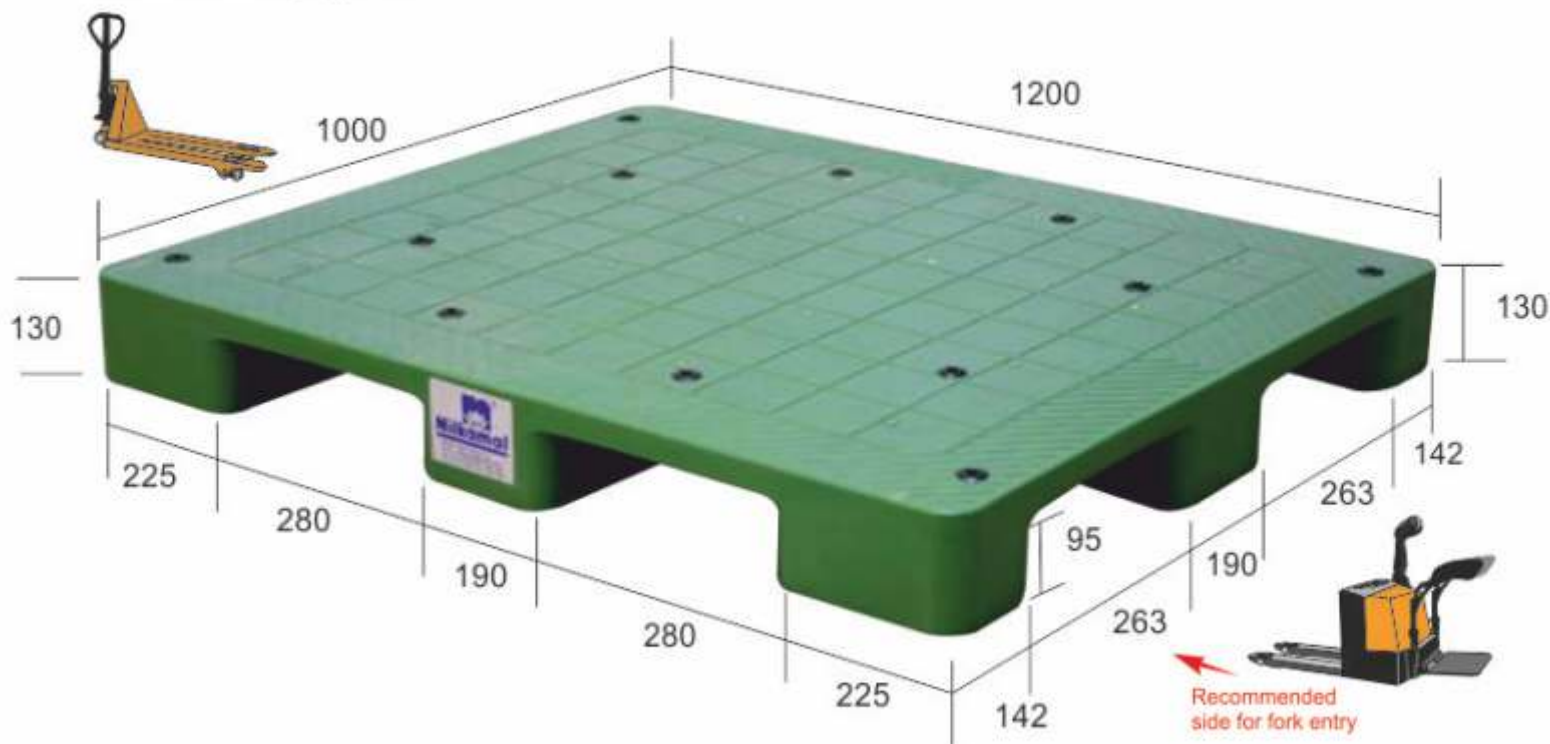

Model	Dimensions	Static Load (Kg.)	Dynamic Load (Kg.)	Racking Load (Kg.) Standard PSS	Drive-In Rack Load (Kg.)	W h	W h	W h	W h	W h	W h

AP-1210-LW-SE	1200 X 1000 X 160	3000	800	250	N.A.	110	180	700	70	360	880

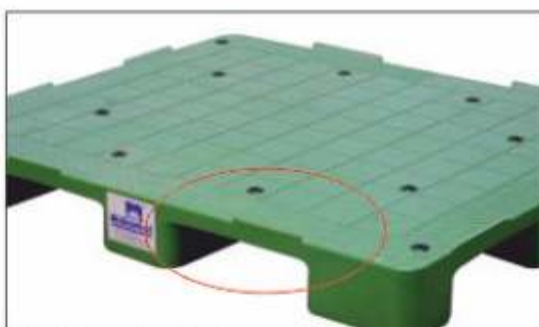

LW : Low Weight ● MW : Medium Weight ● HW : Heavy Weight ● SE : Safety Edge ● EP : Engineering Plastic. Safety Edge is for protection of crates, cartons, boxes etc. from slipping off during handling. All pallets have standard features of Strapping hook. The advantage of incorporating strapping hook is load gets uniformly distributed over pallet, so bending is reduced & load bearing capacity goes up. If you do not use strapping hook & belt, load bearing capacity goes down.

INJECTION MOLDED PALLETS (MODEL : SP - 1210)

- Cost effective solutions for all your shop-floor handling, storage & flexible logistics systems in almost all sectors.
- Meets general hygiene conditions.
- Suitable to handle with all kinds of Material Handling Equipments.

Upside Down

With Safety Edge (Optional)

Compatible MHE :	
Equipment	Refer to Page No.
Hydraulic Hand Pallet Truck	XXX
Electric Pallet Truck	XXX
Recommend to lift from small side (1000 mm.) with wider spread fork. 9-foot pallet should be uniformly lifted to avoid pallet sagging. Do not throw, shoulder drop on flat deck.	

Model	Dimensions	Top Deck	Static Load (Kg.)	Dynamic Load (Kg.)	Racking Load (Kg.)	W			L		
						h	B	A+B+A	h	F	E+F+E

HW : Heavy Weight ● MW : Medium Weight ● SE : Safety Edge. Safety Edge is for protection of crates, cartons, boxes etc. from slipping off during handling.

INJECTION MOLDED PALLETS

Whatever the type of load you have, Nilkamal has the right pallet for you....

NILKAMAL'S pallets are developed in close association with user industry and technological advances in material handling & storage systems. They are proven as viable replacements to conventional pallets. They not only meet environmental and economical considerations but also contribute in improving storage system, product distribution efficiency, product protection and enhanced human safety.

Special Features :

- Consistent in shape & dimensions
- Light-weight yet strong & durable
- Prevent microbiological growth ● Does not absorb water or liquids
- Performance does not degrade by commonly used chemicals, solvents and cleaning agents
- Anti-slip surface prevents slippage of the load in handling and on racks
- Easy to clean and handle.

Important Information :

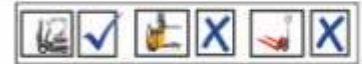

- All specifications are subject to change without notice and are approximate
- Pallet load capacity is linked to your product bulk density, package dimensions, layout, MHE & rack design
- The data on pallet load capacity is indicative and based on **UDL** (Uniformly Distributed Load).
- Racking load stands on the capacity of the pallet rested on length direction
- It is advisable to use and test the sample for all the requirements
- We can supply **RFID embedded pallets based on customer's requirements.**
- All your requirements of M.H.E. (Material Handling / Lifting Equipments) and Storage Rack Systems are now available with Nilkamal - ex-stock.

TILE PALLET

AP0606 : ALL PURPOSE MULTI-PURPOSE 2 WAY, 3 RUNNER, PERFORATED DECK HEAVY DUTY PALLETS

LARGE SIZE PALLET

DP 1311 : MULTI-PURPOSE 4 WAY, ANTI SLIP PERFORATED DECK REVERSIBLE PALLETS ESPECIALLY FOR WET FLOORS

GMP - SC : Stackable Rackable conveyor handling

FP Series : Full Parameter Stack, Rack, Used with Pallet Truck

OW Series : One Way Stackable

GMA Series

DP Series : Reversible Pallet

DPR Series : Flat Deck Reversible

GMP Series : HACCP, Hygiene Stringent regulation pallet for wipe & clean dust

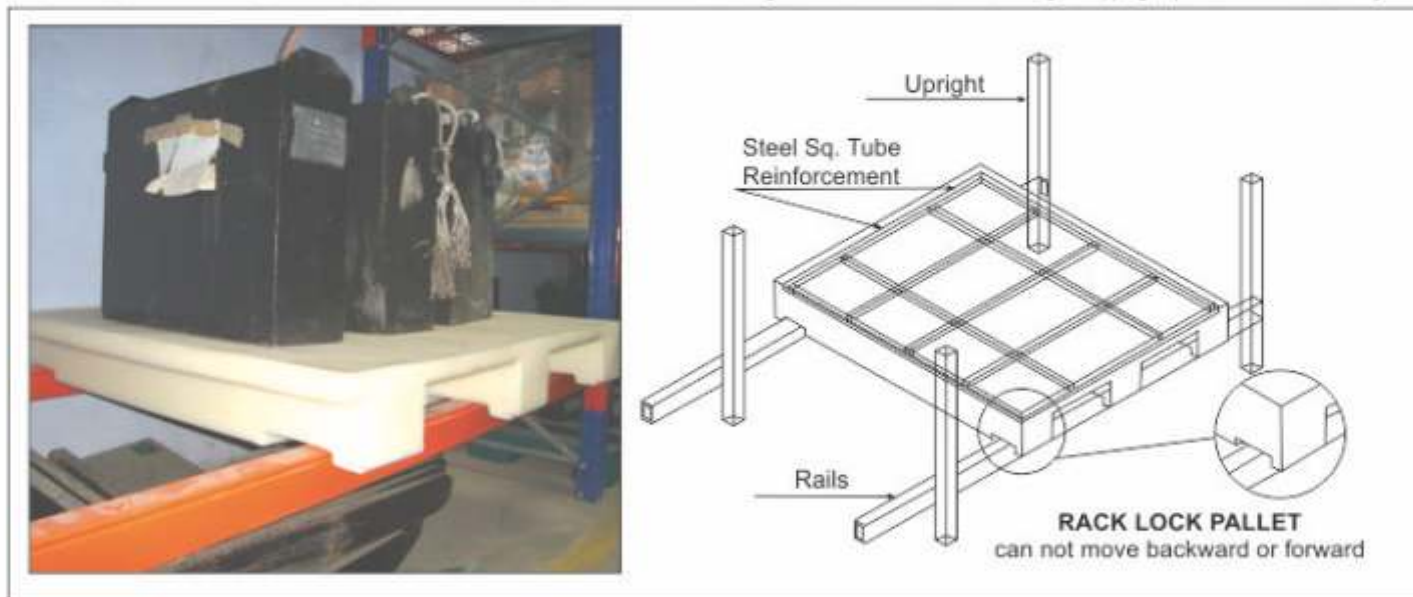

EP Series : Export / Nestable

ROTO MOLDED PALLETS

- Hygienic and useful for GMP clean rooms ● Environment friendly ● Durable and cost effective ● Easy to maintain – just wipe and clean. Machine wash and steam cleaning also possible ● Resistant to commonly used chemicals ● Exclusive Rack lock for locking pallet on standard rack, ● Wings on Rail for drive-in racking ● Hi-end textures available.

RACK LOCK PALLETS WITH STEEL RE-INFORCEMENT : No bending even with Point Load. No shifting or slipping of pallets. Enhanced Safety

3 Runner Pallets : For General Usage On Rack & Floor :

With Rack Lock, Safety Edge & Wing Runners

RP1212C3RUS1Z1
1200(L) x 1200(W) x 160(H) MM.

With Rack Lock & Wing Runners

RP1210F3RUS2
1200 (L) x 1000 (W) x 150 (H) MM.

With Rack Lock & Flush Runners

RP0707F3RU3
750 (L) x 750 (W) x 150 (H) MM.

With Flush Runners

RP0909F3RUSJ4
900 (L) x 900 (W) x 150 (H) MM.

With Safety Edge & With Flush Runners

RP1515DA3RUS6
1500(L) x 1500(W) x 160(H)MM.

With Rack Lock, Safety Edge & Flush Runners

RP1010CO3RUS9
1000 (L) x 1000 (W) x 160 (H) MM.

With Flush Runners

RPROLL1210F3RUJ4
1200 (L) x 1000 (W) x 260 (H) MM.

With Rack Lock, With Safety Edge & With 5 Flush Runners

RP1208P5RUS6
1200 (L) x 800 (W) x 160 (H) mm.

9 Legs Pallets - For Floor Usage

With Kiss-off Bottom, Stacked Leg, Wing Leg, Kiss-off Bottom of Legs

RP1210F9L51
1200 (L) x 1000 (W) x 150 (H) MM.

Flat Bottom, Tapered Leg, Flush Leg, Flat Bottom of Legs

RP1210F9LUS53
1200 (L) x 1000 (W) x 160 (H) MM.

With Flat Bottom, Round Leg, Flush Leg, Flat Bottom of Legs

RP1212F9LUS52
1200 (L) x 1200 (W) x 160 (H) MM.

Customized Innovations : Pallets for ASRS, RFID, automated hi-speed multi-tier conveyor & sensor sorting needs special deck design & texture surface. Thanks to in-house software based designing capabilities and further CNC machining facilities, we provide proprietary solutions and which has improved anti-slip property, improved feasibility with robotized handling and improved security and useful life of pallet & other value additions.

Model No : **RP1010P2R3LUSJ4.**

Dimensions : 1000X1000X150MM • Texture type : PERFORATED.

Useful for : DAIRIES AND COLD STORAGE FOR AIR CIRCULATION.

Model No : **RP1108C3RUSJ6.**

Dimensions : 1130 X 830 X 210 MM • Texture type : BIG CHEQUERED.

Useful for : HEAVY LOAD IN AUTOMOBILE INDUSTRY & OTHER GENERAL PURPOSE.

Model No : **RP1208C3RU3** • Dimensions : 1200 X 800 X 130 MM.

Texture type : CHEQUERED TOP WITH HANDLE FOR LIFTING.

Useful for : STORAGE OF CARTON BOXES FOR LIGHT APPLICATION.

Model No : **RP1208D3RUS3Z1** • Dimensions : 1200X800X160MM.

Texture type : DIAMOND TOP WITH STRAPPING SLOT.

Useful for : CARTONS AND SMALL CONTAINERS.

Model No : **RP1208180B3RUS6.**

Dimensions : 1215X810X180MM.

Texture type : BOX TYPE DESIGN. | Useful for : BOXES

Model No : **RP1385C3RUS3Z1**

Dimensions : 1320 X 850 X 165 MM • Texture type : CHEQUERED DESIGN.

Useful for : CARTONS, BOXES.

SPILL PALLETS & DRUM PALLETS

SPILL CONTAINMENT PALLETS : Nilkamal's Spill Containment Pallets are an absolute must for food and pharma companies. Spillage can occur anywhere / any time and can contaminate sensitive food and pharma products or clean rooms, causing huge rejections and recalls. Nilkamal's Spill Containment Pallets are made to international standards and are an absolute necessity for your pharma or food manufacturing set-up.

Injection Molded :

Model : **IMPC120L3RSPIIL**
Dimensions : 1330 (L) x 670 (B) x 150 (H) mm.

Model : **IMPC200L3RSPIIL**
Dimensions : 1330 (L) x 670 (B) x 400 (H) mm.

Roto Molded :

Model : **RMPC100L3RSPIIL**
Dimensions : 1300 (L) x 1300 (B) x 200 (H) mm.

Model : **RMPC525L3RSPIIL** • Dimensions : 1300 (L) x 1300 (B) x 575 (H) mm.
Pallet with lid • Stacking : Ground +2 • Sump capacity : 525 liters

DRUM PALLETS :

Model : **AP1111SC**
Dimensions : 1100 (L) x 1100 (W) x 140 (H) mm. approx.
Load Bearing : Uniformly Distributed Load :
Static : 3600 kg. • Dynamic : 1200 kg. • Racking : 600 kg.
Should be handled with Forklift or Pallet truck only.

Model : **DP1212**
Dimensions : 1200 (L) x 1200 (W) x 150 (H) mm. approx.
Load Bearing : Uniformly Distributed Load :
Static : 6000 kg. • Dynamic : 1500 kg. • Racking : 1000 - 1500 kg.
Should be handled with Forklift only.

KIT CRATES :

NILKAMAL introduces **KIT CRATE** with Zero Defects –Best in class Quality. Safe, Clean Ergonomic Work Environment. No “non-value” duplication or added work. Communication, Standardization, Visual work place with provision for continuous improvement. Larger the load handled, the lower the cost per unit handled.

SIDE WALLS FOLDING KIT CRATES :

Model : CH1210590

Outside Dimensions : 1200 (L) x 1000 (B) x 590 (H)

Model : CH1210975 (Folding Kit Crate with Lid)

Outside Dimensions : 1200 (L) x 1000 (B) x 975 (H)

Step Wise Assembling Process

Model : CH1210800 | Outside Dimensions : 1200 (L) x 1000 (B) x 800 (H) All four side walls fold on base pallet, 2-way fork entry, 2-Bottom Runner Design.

BULK KIT CRATES (With closed & perforated walls) :

Model : CH1210740 (Bulk Kit Crate) | Outside Dimensions : 1200 (L) x 1000 (B) x 740 (H)

Available with solid closed walls and perforated walls and 2 way entry, 3 runner design, suitable for racking & stacking.

ROLLING EQUIPMENTS

Nilkamal pioneered the use of Plastic crates in India and has maintained leadership position in the Indian market. Innovation, a proactive approach to customer needs has led us to offer the widest range of molded plastic crates in the Indian market, catering to practically every user segment and also creating some in the process. No wonder that we count the best and most demanding names in the Indian Industry amongst our established customers. This section gives extensive information on our range of **Injection Molded Crates** (also known as **Series Crates**) for various industries. You will find detailed lists of models and respective versions along with their outer and inner dimensions that would help you make your buying choices easier.

PLATFORM HAND TRUCKS

PLATFORM HAND TRUCK

Model : PH100
Capacity : 100 kgs.

ZINC CHROME PLATFORM HAND TRUCK

Model : PH350ZNCR
Capacity : 350 kgs.

Model : PH150SS
Capacity : 150 kgs.

MINERAL WATER SACK TROLLEY

Model : SCT250AL-7 • Capacity : 250 kgs.

WHEEL BARROW

Model : WB220 • Capacity : 220 kgs.

MULTI PURPOSE SERVICE TROLLEY

Model : SRT300 • Capacity : 300 kgs.

HOT DIP GALVANIZED METALLIC ROLL CAGE

Model : MHDRC1170170 • Capacity : 500 kgs.

Model : MHDRC10811550 • Capacity : 500 kgs.

METALLIC CAGES & BULK CONTAINERS

METALLIC CAGES : Nilkamal Full View Foldable Galvanized Metal Wire Cage is the clear choice for better bulk material handling, storage, JIT closed loop returnable systems. ● Rustproof ● Durable ● No Fire hazard ● Can withstand all kinds of environments ● Virtually indestructible ● Low weight to load ratio as containers are lighter ● No performances sacrifice in cold, hot, sultry or highly corrosive atmosphere and salt spray conditions for ocean transportation

Metallic Wire Mesh Crates

Ap1210 with Pallet Cages

Metallic Bulk Cages

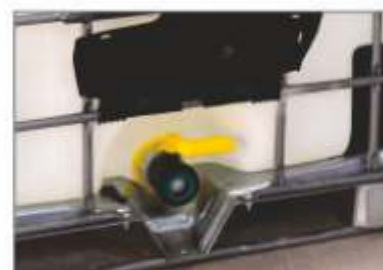

BULK CONTAINERS :

- Reusable industrial container designed for the transport and storage of bulk liquid and granulate substances (e.g. chemicals, food ingredients, solvents, pharmaceuticals, etc).
- Stackable containers with a metal frame and a metal pallet base designed to be moved using a forklift or a pallet truck.
- Built-in tap at the base through which the contents can be poured out into smaller containers or to which a hose can be attached.

Advantages :

- Transport more material in the same area than round drums and far more than might be shipped in the same space if packaged in consumer packs.
- The manufacturer/processor of a product can bulk package a product at one location and ship to another location at a reasonably low cost where it is subsequently packaged in final appropriate consumer packs for retail distribution.

Drainage valve for attaching pipe or tap

Drainage valve with pipe or tap

Nilkamal is the only company in India, which offers complete solutions for material handling under oneroof. Our main features & USP are :

● Latest Technology ahead of time ● Ex-stock Availability ● All products conform to European norms (CE). You will find detailed lists of models and respective versions along with their capacities and lift heights and their usage areas that would help you make your buying choices easier.

Products covered are:

Model : FB13/15/18/20TCA
Capacity (kg) : 1250-2000

SPECIALIZED MATERIAL HANDLING EQUIPMENTS

THE LONG LOADS SPECIALIST FORKLIFT

The CombiLift is designed to handle long-loads safely. By eliminating the need to travel with elevated long loads, the unit provides greater stability. Using patented, leading edge technology, CombiLift forklifts are equipped with a unique 4-way steering system that allows the units to travel sideways with long loads. This system gives the user multi-directional capability, delivering possible space savings of up to 100%. The CombiLift eliminates the unnecessary multiple handling of goods by being able to manoeuvre easily through doorways that are narrower than the load it carries. This results in less product damage and safer handling as well as eliminating the need for oversized doorways or conveyors.

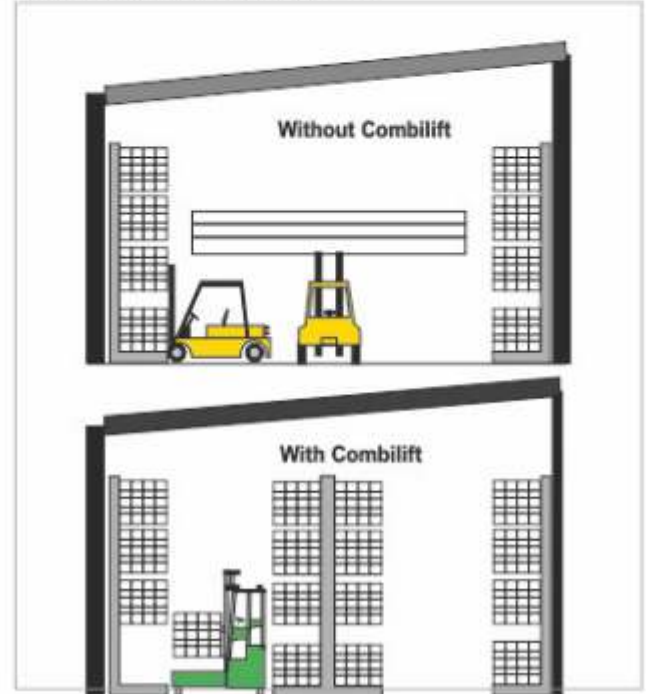

Model : **CB2500** • Lift height as high as : **7500 mm.**

Lift Capacities up to : **25000 kg.**

Type of models : **Diesel, Electric & LPG**

How CombiLift Works For You :

Moving long goods through doorways with sideways movement

SPECIALIZED MATERIAL HANDLING EQUIPMENTS

THE LONG LOADS SPECIALIST FORKLIFT

Perfect for movement of long & huge pipes

Ideal for movement in narrow spaces such as Cantilever Storage Systems

SPECIALIZED MATERIAL HANDLING EQUIPMENTS

VERY NARROW AISLE ARTICULATED FORKLIFT

Also Available On Long Term Rent

- Reduces aisle widths & increases storage space
- Increases storage space by up to 50%
- Enables a dramatic reduction of working aisle widths
- Cut warehousing costs
- The 2-in-1 machine - Reach Truck and counterbalance forklift in one machine
- Lift capacities of up to 2.5 t
- Electric and LPG powered models

Maximum Lift
Height Up to
41 Feet
(12.5 Metres)

Aisle Width as low as : 1750 mm. • Lift height as high as : 12500 mm.
Lift Capacities up to : 2500 kg. • Type of models : Electric & LPG

HOW AISLE MASTER WORKS FOR YOU

Increases the storage
space available by up
to 50% as compared to
a normal ELECTRIC
STACKER or FORKLIFT
TRUCK

- Lifts 900 kgs. up to a massive 12.4 meters.
- Mast equipped with camera to guide positioning of pallet
- Can operate in an aisle width as narrow as 2.1 meters.

SPECIALIZED MATERIAL HANDLING EQUIPMENTS

THE CONTAINERS & OVERSIZED LOADS HANDLING SPECIALIST

COMBILIFT STRADDLE CARRIER

Model : COMBI SC • Lift Capacities up to : 35000 kg.

- 2-Wheel Hydrostatic Drive
- 2-Wheel Steer
- Capable of travelling fully loaded
- 2 Minute Off-Loading From Trailer To Ground
- Excellent 360 ° Visibility From Driver Position
- Eliminates Trailers Waiting To Be Loaded And Unloaded
- Safer Stuffing / De-stuffing At Ground Level
- Low Ground Pressure When Fully Loaded
- More Economical To Run Versus Reach Stackers
- Reduced Energy Consumption
- Lighter Weight Versus Reach Stackers
- Narrow Aisles For Maximum Storage
- Rough Terrain & Ramp Friendly
- Works On Compacted Stone, Bitumen And Light Concrete
- Exceptional 3-Wheel Maneuverability Circle

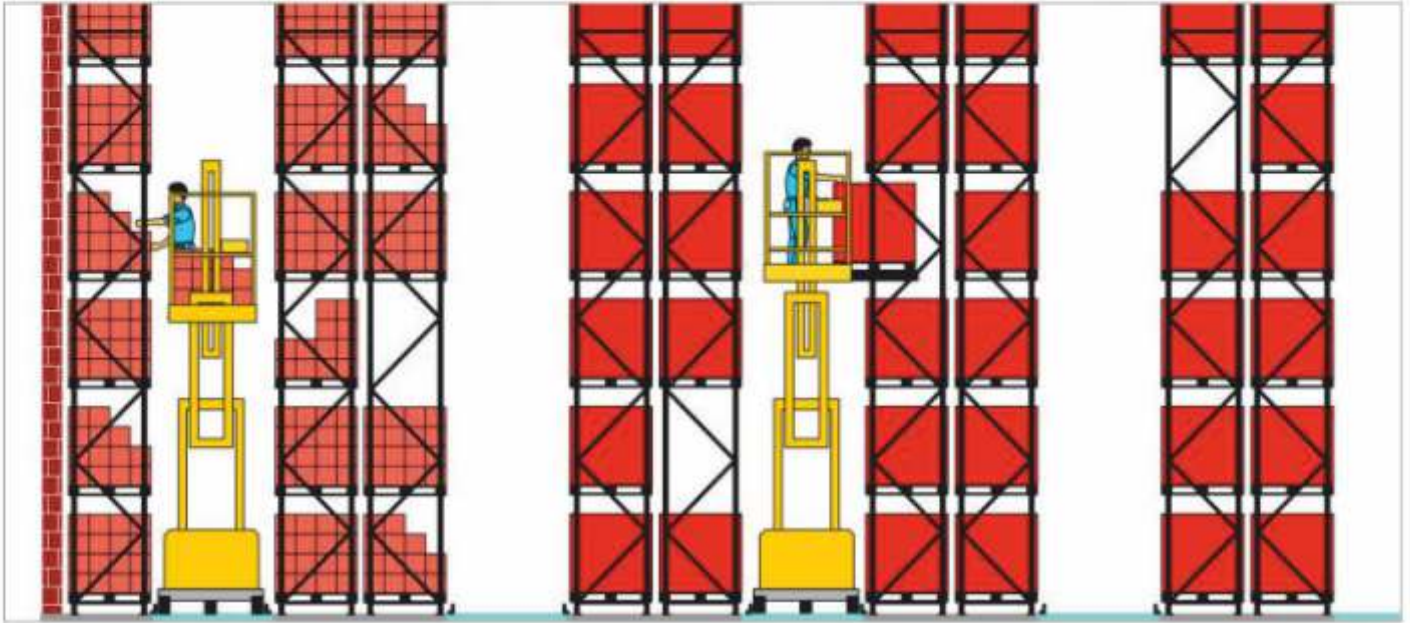

SPECIALIZED MATERIAL HANDLING EQUIPMENTS

MAGAZINER MAN-UP TURRET TRUCKS

Maximise your Order Picking Efficiency!

Magaziner Man-Up Turret Trucks meet the rigorous industry standards, and are also flexible to meet the space and material transport requirements of the individual customer. Compact, powerful, manoeuvrable – and above all adaptable to the customer's specific environment. Magaziner Man-Up Turret Trucks, from Magaziner Lager- & Fördertechnik, **Germany**. The perfect solution for unit load storage and individual article order selection. Since the operator rides up with the load to the desired storage location, he is afforded an equally good view of the load and its rack destination. With a minimum frame width of 1,000 mm and a maximum lift height of 9 mtrs. to 17 mtrs, the Magaziner EK series offers the optimum space utilization. Capacities range from 1.1 tons to 1.5 tons.

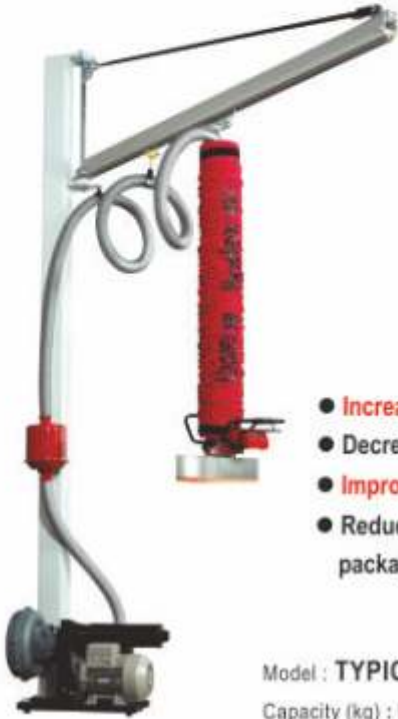

MAN-UP TURRET TRUCKS (Very Narrow Aisle - V.N.A.) (7 Models available) | Lift height up to : 9000 mm.-17000 mm. • Lift Capacities up to : 1100-2000 kg.

These Vacuum lifters are typically used in the following industrial segments :

- Airports • Distribution centres • Parcel carrying terminals
- Various Industrial application for lifting loads upto 200 kgs and for palletizing / depalletizing various products.

- **Increase labour productivity**
- **Decrease labour fatigue**
- **Improve handling**
- **Reduce damages to sensitive packages**

Model : **TYPICAL VACUUM LIFTER**

Capacity (kg) : Upto 200

Parcel carriers moving & scanning

Order picking at picking area

Used for sacks picking

Used for carton picking

INNOVATIVE STORAGE SYSTEMS

Nilkamal BITO Storage Systems Pvt. Ltd (NBSS), is an ISO 9001 2008 company and a 50:50 Joint Venture between Nilkamal Ltd., the largest manufacturer of material handling crates and bins in India & BITO Lagertechnik Bittmann GmbH, a leading manufacturer of Storage systems in Europe. NBSS is into manufacture and sale of storage systems in metal. With a manufacturing facility equipped with the latest machinery imported from Europe, we are steadily growing to cater to systematic material storage needs and quick retrieving requirements right from the manufacturing level to warehousing level. Our PLC integrated "Punching- Roll forming - Cutting" line and automated powder coating line ensures international quality engineered products.

Pallet Storage Systems

Universal Storage Systems

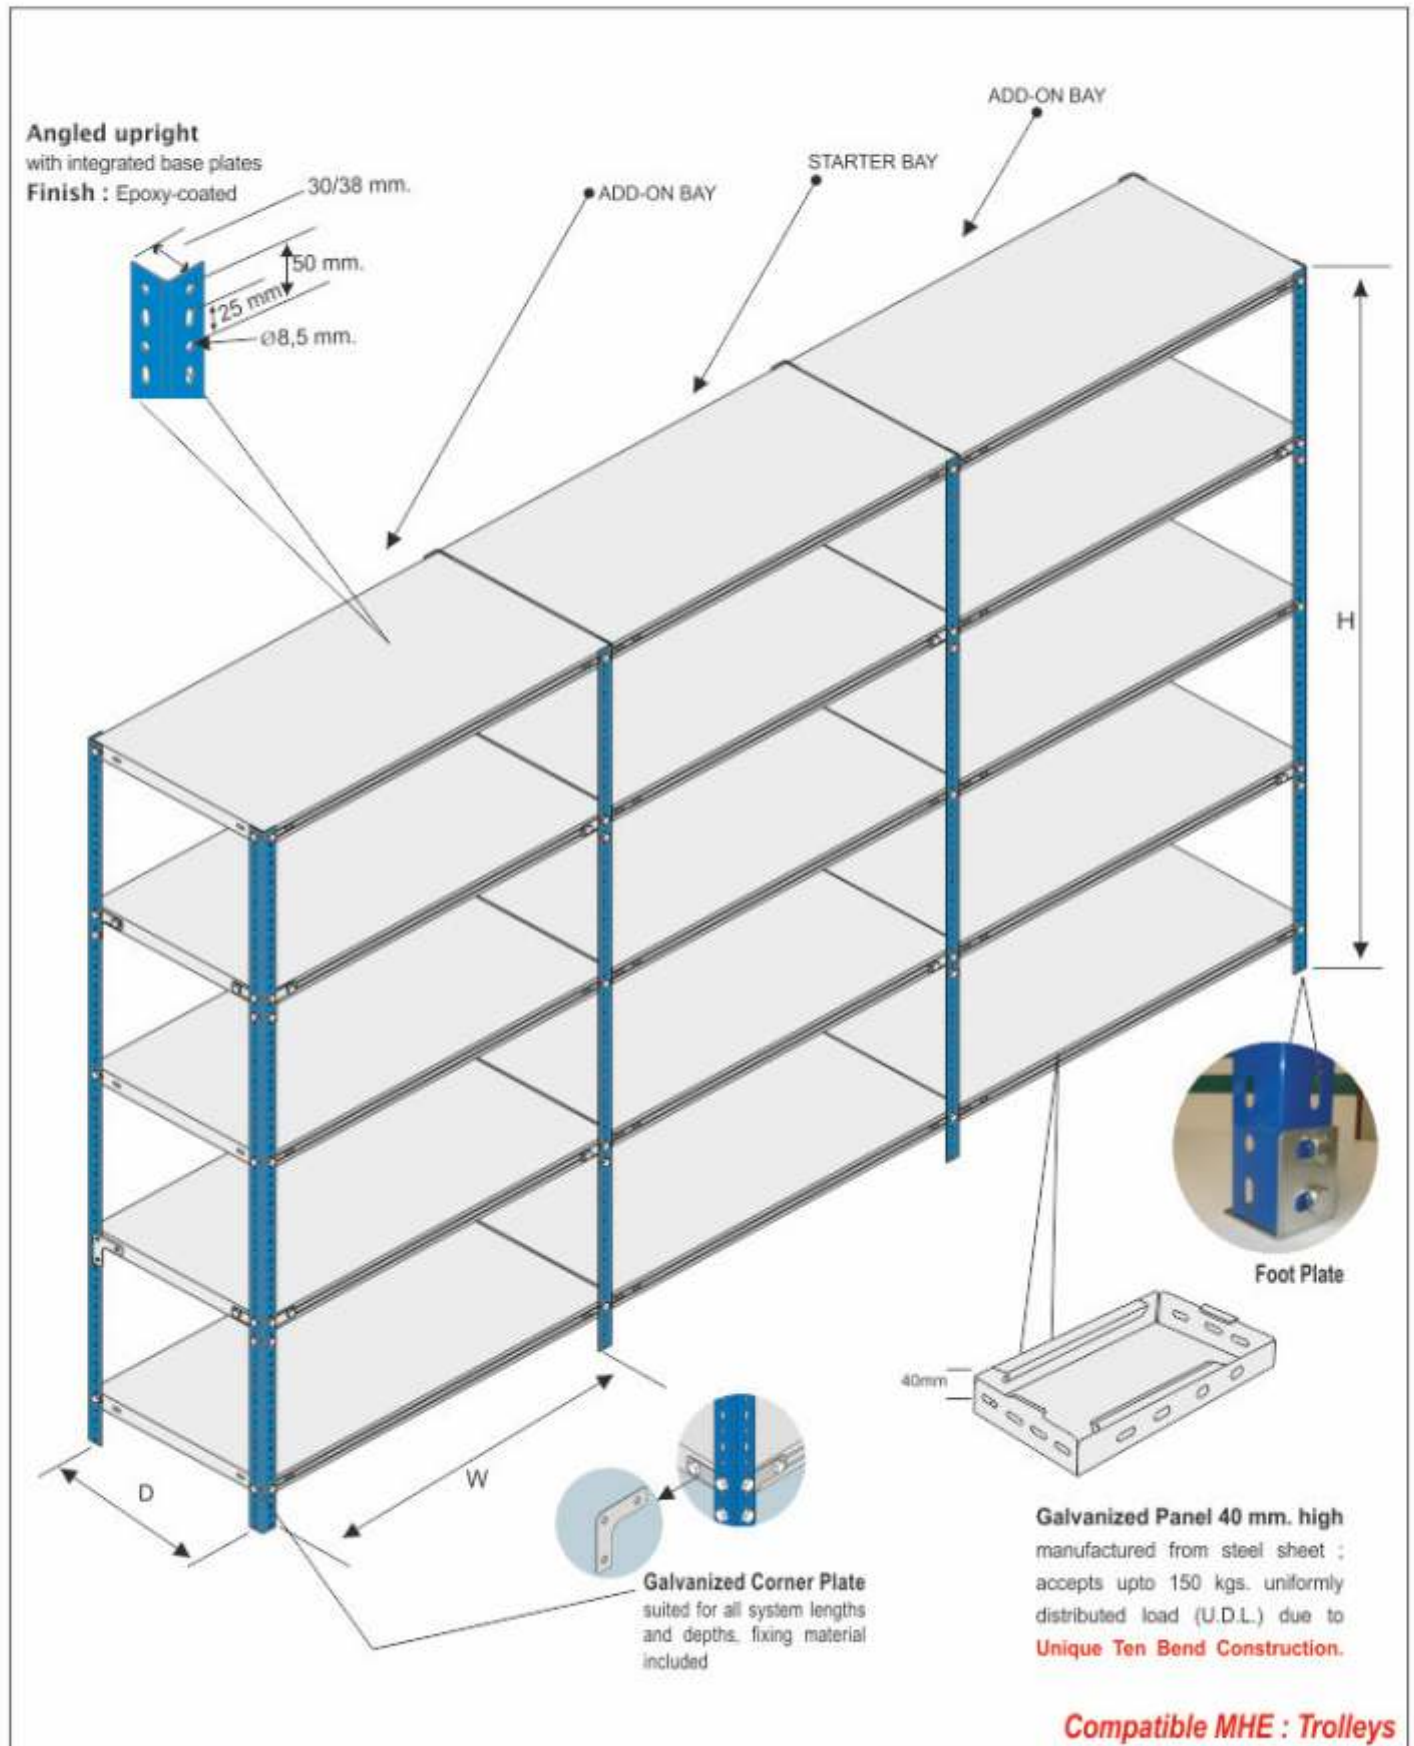

Mezzanine Storage Systems

INNOVATIVE STORAGE SYSTEMS

UNIVERSAL STORAGE SYSTEM (USS)

General Advantages :

- Quick and easy to assemble, mount & cost-effective installation
- Economical in long run
- Also ideal as storage for archives
- More storage capacity on less floor space
- Increased load capacity due to corner plates
- Direct access to all references
- Very good overview due to clear product presentation
- Can be integrated into almost any storage environment
- Platforms can be conveniently re-adjusted on a 25 mm pitch
- Extension bays can be added whenever required

INNOVATIVE STORAGE SYSTEMS

Nilkamal BITO Storage Systems Pvt. Ltd (NBSS), is an ISO 9001:2008 company and a 50:50 Joint Venture between **Nilkamal Ltd.**, the largest manufacturer of material handling crates and bins in India & **BITO Lagertechnik Bittmann GmbH**, a leading manufacturer of Storage systems in Europe. NBSS is into manufacture and sale of storage systems in metal. With a manufacturing facility equipped with the latest machinery imported from Europe, we are steadily growing to cater to systematic material storage needs and quick retrieving requirements right from the manufacturing level to warehousing level. Our PLC Integrated "Punching- Roll forming – Cutting" line and automated powder coating line ensures international quality engineered products.

UNIVERSAL STORAGE SYSTEM (USS)

General Advantages :

- Quick and easy to assemble, mount & cost-effective installation
- Economical in long run
- Also ideal as storage for archives
- More storage capacity on less floor space
- Increased load capacity due to corner plates
- Direct access to all references
- Very good overview due to clear product presentation
- Can be integrated into almost any storage environment
- Platforms can be conveniently re-adjusted on a 25 mm pitch
- Extension bays can be added whenever required

INNOVATIVE STORAGE SYSTEMS

UNIVERSAL STORAGE SYSTEM WITH FLEXIBLE PARTITIONS :

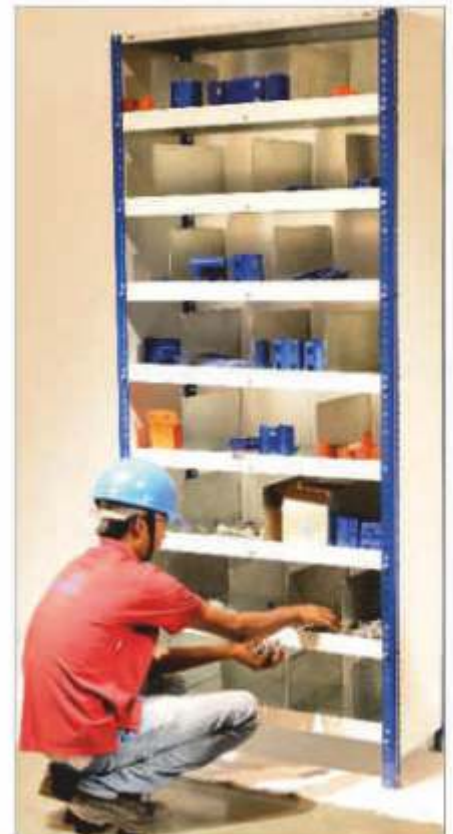

The One Product for your Non-Standard Storage Needs! Introducing a Universal Storage System with total flexibility - The NBSS Flexi-Rack. With flexible partitions and multi-slotted panels and front stopper strips, the Flexi-Rack is the perfect solution for well segregated storage of nut -bolts, tools and small components. Slotted uprights allow for adjustable levels, so you can adjust height between any two levels to your requirement. Similarly, the panels have multiple slots to take in vertical separators, so the storage space can be adjusted horizontally too. The Flexi-Rack also takes front stopper strips, thus providing security against slippage or spillover for the contents stored. The Flexi-Rack is a superior product brought to you by Nilkamal Bito Storage Systems, an Indo-German joint venture between Nilkamal Ltd and BITO Lagertechnik Bittmann GmbH

Just adjust the flexi way...!!! : Slotted uprights allow Flexibility to adjust levels. Slotted panels allow Flexibility to adjust horizontal space too !

Store. Stop spilling over...!! : Front stopper strips hold back the contents of the storage partitions from spilling over.

LONG SPAN SHELVING SYSTEM (LSS) :

Long Span Shelving (LSS) is a product used for storing light and medium heavy goods, ranging from 150 kgs to 600 kgs. Ideal for products longer than 1300 mm and load per level greater than 200kgs. Thus the product fits in the intermediate category between the Universal Storage System (USS) and Pallet Storage System (PSS). Euro Pallets (1000 x 800mm) can be stored under the bottom level when the span is 2300mm.

Long span shelving can be used to store virtually anything, like :

- Crates • Boxes • Rolls • Files • Packets • Corrugated boxes • Paint cans
- The list can go on almost endlessly, for products between the range of applicable size and weight

Series	Frame height	Loading Levels	Shelving Depth	Beam width / Load per level
Light	2000 mm	4	600	1500 mm / 500 kg
			800	1800 mm / 400 kg
			1000	2400 mm / 325 kg
Light	2500 mm	5	600	1500 mm / 500 kg
			800	1800 mm / 400 kg
			1000	2400 mm / 325 kg
Light	3000 mm	6	600	1500 mm / 500 kg
			800	1800 mm / 400 kg
			1000	2400 mm / 325 kg
Heavy	2000 mm	4	600	1800 mm / 725 kg
			800	2400 mm / 560 kg
			1000	2700 mm / 625 kg
Heavy	2500 mm	5	600	1800 mm / 725 kg
			800	2400 mm / 560 kg
			1000	2700 mm / 625 kg
Heavy	3000 mm	6	600	1800 mm / 725 kg
			800	2400 mm / 560 kg
			1000	2700 mm / 625 kg

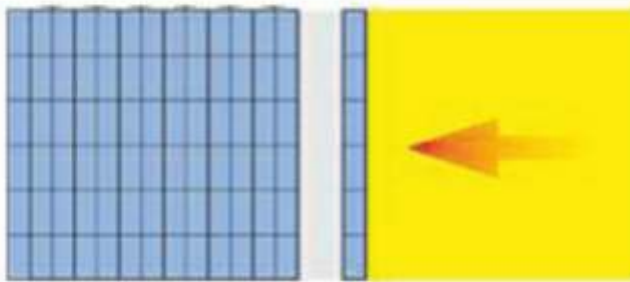

Compatible MHE : Trolley & Ladder (Refer page no. 38)

INNOVATIVE STORAGE SYSTEMS

MOBILE COMPACTOR STORAGE SYSTEM :

SAVES MORE SPACE V/S A STATIC STORAGE SYSTEM :

Mobile Compactor System is based on the same components as a static system. Mounted onto light or heavy duty base units which can be moved in parallel direction to each other, the system only requires one aisle to provide access to all items in stock. Depending on the system, storage capacity increases between 100 % and 180 % respectively floor space occupation reduces by up to 50%.

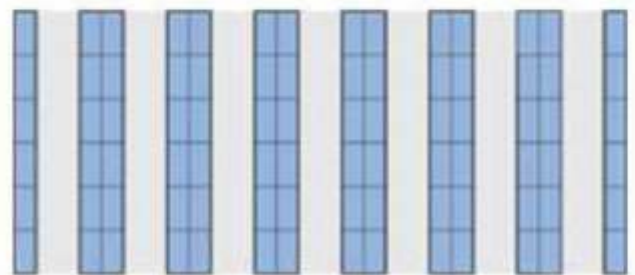

Configuration:

2 Static single rows (single sided use) • 6 Static double rows (double sided use)

Space requirement : 9,650 x 6,100 mm • Floor space gained : 45 %

Floor space utilization : 45 %

Configuration :

2 Static single rows (single sided use) • 6 Mobile double rows (double sided use)

Space requirement: 5,300 x 6,100 mm • Floor space gained : 45 %

Floor space utilization : 85 %

MOBILE COMPACTOR STORAGE SYSTEM :

Useful for compact storage small spaces, the NBSS Mobile Compactor Systems are designed as per the floor space available and for storage and movement. Customer need is fully studied and solutions discussed prior to the final recommendation. The NBSS Mobile Compactor Systems are very Compact and provide smooth mobility and an exclusive locking system for the storage security.

GENERAL ADVANTAGES :

- Economic storage
- Higher floor surface utilization
- Increased storage capacity
- Improved overview of all product lines on stock
- Reduction of floor space costs as compared to static storage
- Increase of storage capacity of up to 180 % over static solutions
- Good utilization of warehouse volume
- Low cost solution
- Base units accept different types of storage systems
- Up to 50 % less floor space occupied
- Direct access to all items
- Effortless manual operation with push handles or cranks

SALIENT FEATURES :

- Custom-made compact system.
- Saves expensive floor space.
- Smooth and easy functioning.
- Prime quality materials and components.
- Locking system is provided for security.
- Built to last.

USER INDUSTRIES :

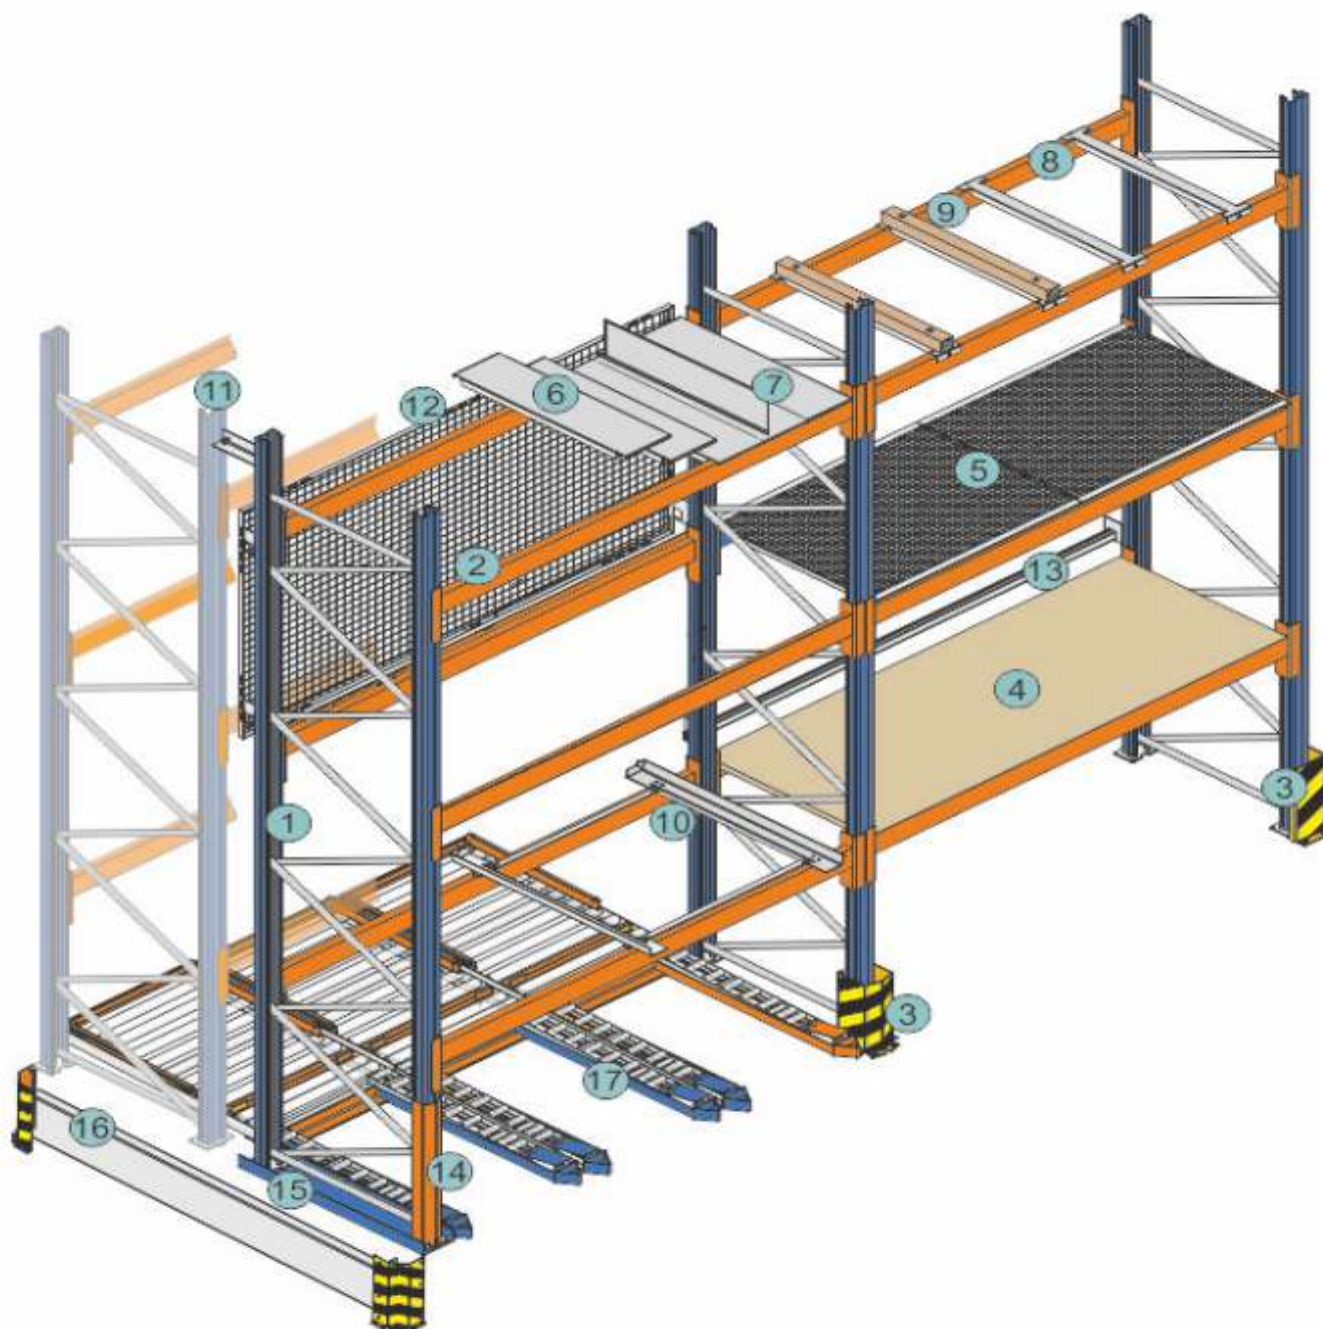

- General Industry
- Pharma & Hospitals
- Libraries & Educational Institutes
- Offices • Warehousing • Logistic Companies

INNOVATIVE STORAGE SYSTEMS

PALLET STORAGE SYSTEMS :

- Multiplication of storage surface by multi-tier or highbay storage systems
- Lower investment costs into real estate and buildings as compared to storage at floor level height
- Suited for a high stock rotation frequency
- Direct access to all bays (reference lines) = easy and convenient order picking
- Fast adaptation to changing reference lines without the need of exchanging your service fleet.

Compatible MHE

Equipment	Refer to Page No.
Hand Pallet Truck	43
Electric Stacker	44
Electric Reach Truck	45
Electric Forklift	51
Aisle Master	56

Racking Pallet Storage Systems :

The most popular and economical system for pallet storage. Suitable for any type of pallet size and weight to optimize storage. This system can be designed to be serviced with any type of MHE starting from hand pallet trucks at floor level to electric stackers, reach trucks, forklift trucks VNA forklift trucks etc.

Advantages : ● Cost effective, maximizes available space ● Suitable for high-bay warehouses with high storage capacity ● Direct access to all the SKU's, easy stock control ● Configuration can be easily modified or extended ● Lower costs by storing bottom level of pallets on floor

Pallet Storage Systems with Decking Panels :

Pallet Storage Systems with Decking Panels facilitates storage of non palletized items. Ideal for medium to large sized items that can be handled manually. It is a flexible system for managing variety of items. Higher levels can be added by providing catwalks and multi-tier systems.

Advantages : ● Loading levels can be customised based on height of the SKU stored. ● Integration possible with suitable material handling equipment for moving material to various levels ● Goods Lifts can be added on custom fabricated staircases provided for ease of use. ● Wide range of accessories available :

Compatible MHE : Equipment : Trolley (Ref. Page no. xxx) ● Ladder (Ref. Page no. xxx) ● Aisle Master (Ref. Page no. xxx)

INNOVATIVE STORAGE SYSTEMS

Mezzanine Storage Systems :

The mezzanine system is the ideal solution for maximum utilization of building height, multiplying the effective surface area available for storage. They are stand-alone structures, easily assembled and adjustable to any space and customer needs. They use a variety of accessories, such as railings, stairs, pallet unloading points, etc. Mezzanines are either rack supported mezzanines with racks making up the ground level or pillar supported mezzanine.

Advantages :

- Boltless assembly of all basic components ● Full length frames - no joining plates required
- Stiffening beams & additional cross bracing provide for a high load capacity & give structural safety to all bays
- Boltless adjustment of all platforms allows flexible positioning of levels ● Safe & convenient stairways secured by railing
- Useful equipment and accessories ● Galvanised surface finish (Epoxy coating upon request)

Pillar Supported Mezzanines :

Rack Supported Mezzanines :

Compatible MHE for both :

Pillar Supported Mezzanine :

Rack Supported Mezzanines :

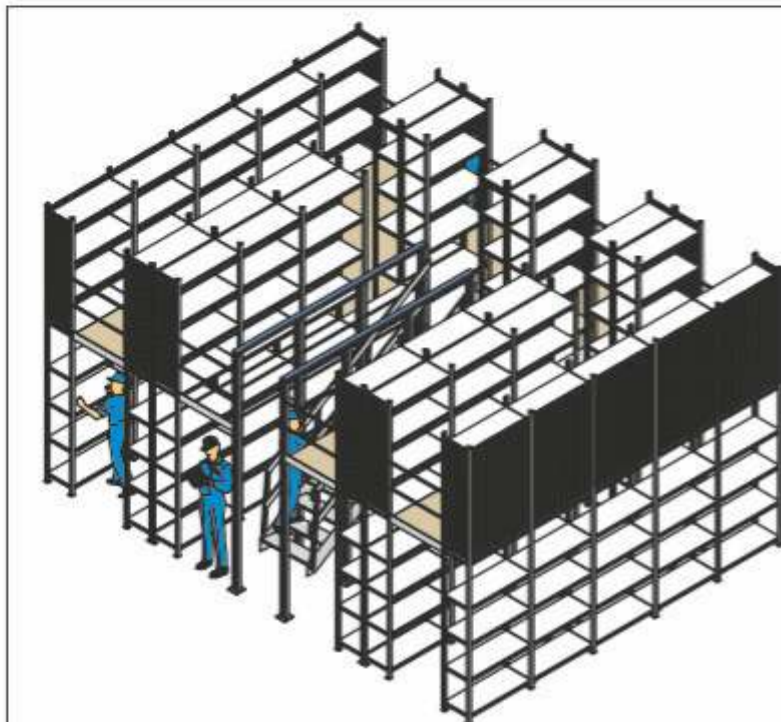

INNOVATIVE STORAGE SYSTEMS

Multi-Tier Storage Systems :

The **Multi Tier Storage System** is the ideal solution for manual storage where available space is limited. This storage system is selective, allows direct access to all references stored; and is adaptable to any type of unit load. This storage system gives best utilization of height by creating different aisle levels which are accessed by means of stairs. The Multi Tier Storage System is shelving built into two or more levels. The bottom shelving supports the upper levels. The uprights are heavy duty in order to bear the loads from the upper levels. Multi Tiers are often used where the storage of many articles is required.

Advantages : ● Utilisation of storage volume can be increased by up to 100% ● High degree of floor surface utilisation ● Simultaneous under picking on several tiers ● Additional floor space is gained for storage & assembly

Two Tier Installation :

Movement of goods inside a Multi Tier Storage System is either manual or assisted by trolleys or even hand pallet trucks, depending on the aisle width of the system. Goods can be moved to higher levels either by Goods lift, carried up stairs (G+1) or to specially configured pallet loading locations on respective levels with suitable MHE such as :

Compatible MHE :

Equipment	Refer to Page No.
Trolley	38
Hand Pallet Truck	43
Electric Stacker	44
Electric Reach Truck	45
Electric Forklift	51

Multi Tier Storage Systems can be configured from either **Heavy Duty Pallet Storage Systems** capped with Decking Panels (**MTPSS**) for heavy loads or from **Universal Storage Systems** components for lighter loads per level (**MTUSS**).

Multi-Tier Universal Storage Systems:

INNOVATIVE STORAGE SYSTEMS

Multi-Tier Pallet Storage Systems - Our Installations

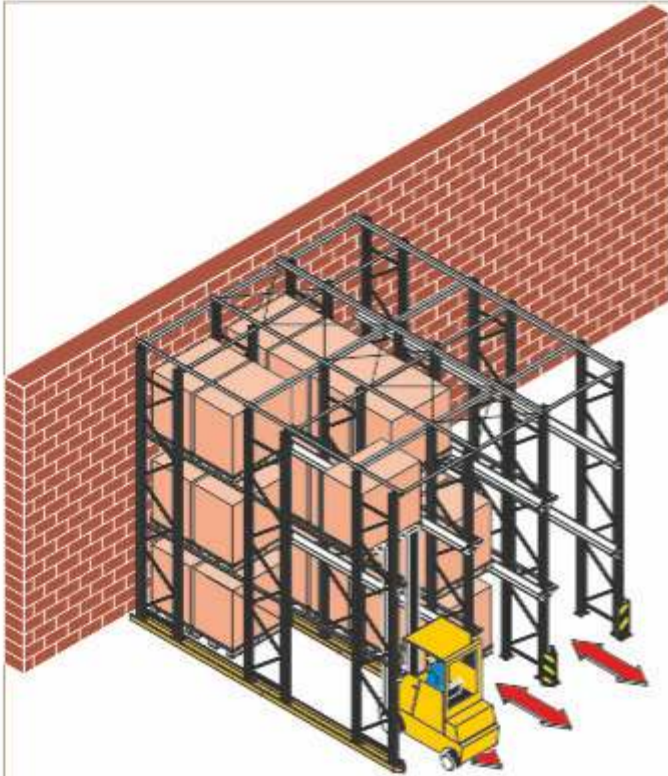

INNOVATIVE STORAGE SYSTEMS

DRIVE-IN SYSTEM :

This type of storage is chosen for pressure sensitive goods or unstable storage units which are stored in big quantities. The range of products stored in this system is small to medium-sized and has a low picking frequency. This storage solution is ideal for a small pallet turnover and favours an employment as seasonal store.

General Advantages :

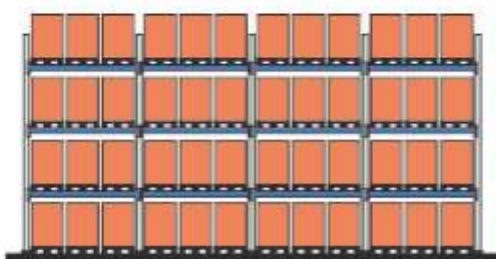

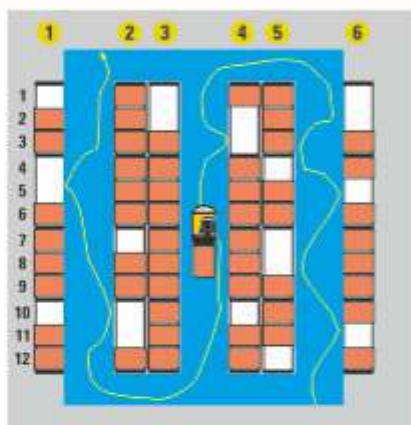

- Compact Storage according to the First In - Last Out principle
- No pressure damage
- Safe storage of pallets with unstable loads
- High volume utilization due to compact storage
- Optimum volume utilization
- Saves floor space
- Very economic pallet storage systems

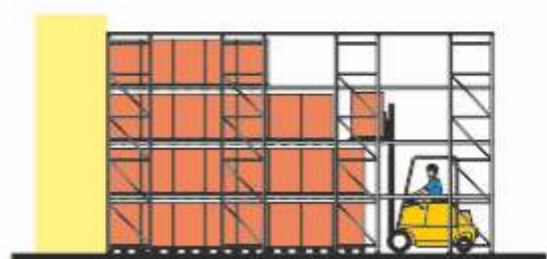

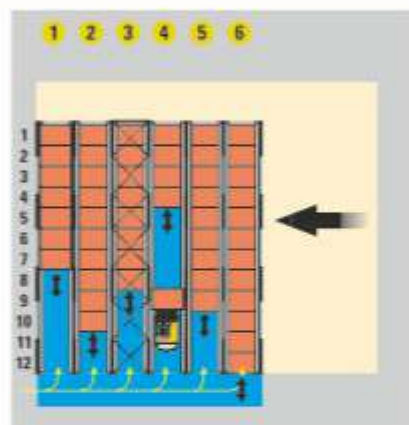

Compatible MHE :

AUTOMATED STORAGE & RETRIEVAL SYSTEM (ASRS) :

Practical storage systems for the growing Indian Industry : Optimizing space efficiency, adaptability and accessibility to all stored items. Systems for warehouses, in-process goods and shop floor. Designing specific solutions tailored to customers needs is our forte; perfection is our passion!

General Advantages :

- Quick and easy to assemble, mount & cost-effective installation
- Economical in long run
- Also ideal as storage for archives
- More storage capacity on less floor space
- Increased load capacity due to corner plates
- Direct access to all references
- Very good overview due to clear product presentation
- Can be integrated into almost any storage environment
- Platforms can be conveniently re-adjusted on a 25 mm pitch
- Extension bays can be added whenever required

INNOVATIVE STORAGE SYSTEMS

PALLET MOVER SYSTEM :

Simple principle for maximum efficiency :

The pallet mover system consists of an automatic shuttle able to move within the drive-in channels offering a high density automated storage. Controlled by an interactive radio transmitter, the pallet mover is able to load, unload and arrange pallets into the drive-in channels. Moved by a fork lift, pallet mover operates in every channel according to the FIFO (First In First out) and LIFO (Last In First out) procedures. A forklift picks up the pallet mover unit, and places it into the center channel of the chosen rack. Thereafter, the forklift places incoming pallet loads on the pallet mover. While the forklift picks up the next pallet to be stored, the pallet mover transports the pallet quickly to its designated storage location within the rack. A wireless remote controls the movement of the pallet mover. The best use for pallet mover is in Cold Storage of food industry where temperatures can reach down to -30° . In such an environment, storage systems have to maximise the number of pallets, feature few aisles so to optimize the ratio benefit/costs. While a pallet mover solution in itself is not a new concept the key differentiator is Nilkamal Bito Storage Systems (NBSS) which brings both specific local and international experience and expertise to work for you.

Main advantages of AUTOSAT® :

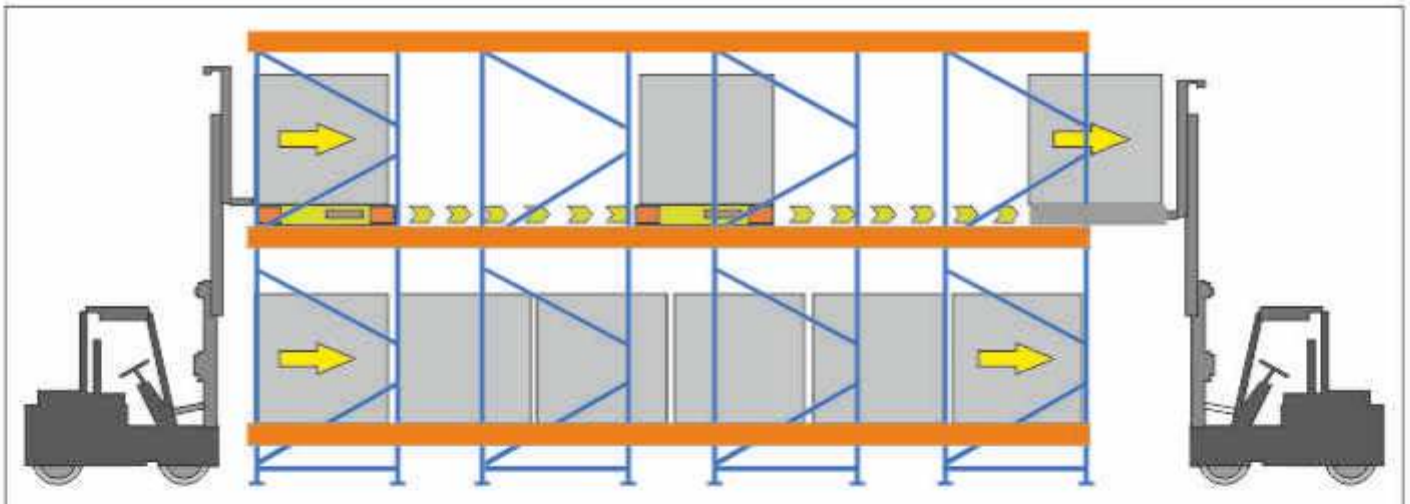

- Efficient system of compact storage for warehouses with low levels of SKU
- Optimising of storage, loading and unloading stages
- Low level of risks or stress to the warehouse operating staff
- Low level of risks or damage to the equipment -loading machinery and racks, thanks to the movement front warehouse

Specific advantages of AUTOSAT® :

- Below Zero BZ mode for environment at low temperatures -down to -30°
- Different models to meet different pallets dimensions
- Setting of gap between pallets through the remote control
- Maximum capacity 1.500 Kg
- Interactive remote control with wave capacity 150 m in open field
- Ion Lithium battery without memory effect

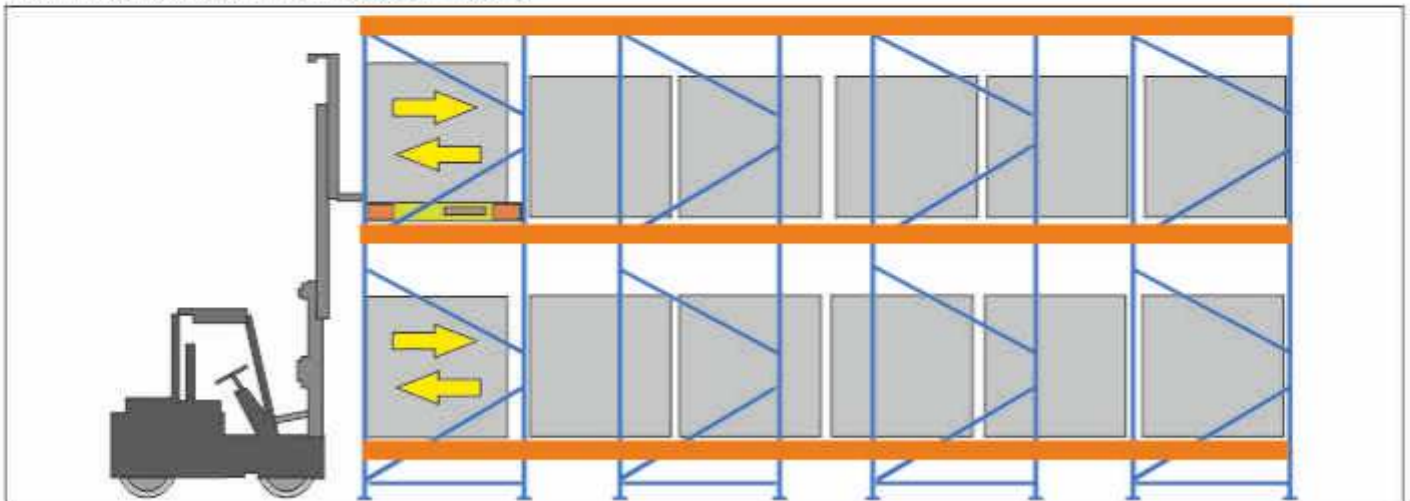

FIRST IN FIRST OUT (FIFO) :

Storage method utilized in the food and pharmaceutical industries due to a precise management of expiry dates. It favors the picking of pallets containing goods produced earlier, hence stored as first. Autosat cooperates in this function allowing storage from one front and picking from the opposite of the racking system. It is necessary therefore, the two fronts of the racks to be free to allow storage and picking.

LAST IN FIRST OUT (LIFO) :

Storage method utilized in the food and pharmaceutical industries due to a precise management of expiry dates. It favors the picking of pallets containing goods produced earlier, hence stored as first. Autosat cooperates in this function allowing storage from one front and picking from the opposite of the racking system. It is necessary therefore, the two fronts of the racks to be free to allow storage and picking.

Kanban Systems :

Available Sizes (With 5 levels) :

1,000 (W) x 800 (D) x 1,300 (H) mm

● 1,400 (W) x 800 (D) x 1,300 (H) mm

Types :

● Both sides inclined ● One side inclined

Accessories provided :

● Front stoppers on all levels

● 4 Nylon wheels per unit (Rubber or metal wheels can be provided on request)

Applications :

A Kanban storage unit is ideally used for smaller and lighter parts needed frequently. It is mostly used near production or assembly areas.

Salient Features :

- Flexible and mobile storage system for small and medium sized light weight parts
- Galvanized platforms ensure a longer rust free life
- Each level has a load carrying capacity of 150 kg UDL with a bay load of maximum 750 kg
- Sturdy construction of the trolley base stabilizes the entire unit
- High quality wheels ensure smooth and trouble free movement

HÄNEL AUTOMATED VERTICAL STORAGE AND RETRIEVAL SYSTEMS FROM NILKAMAL

The Hänel LeanLift, RotoMat and LockoMat

Hanel Automated Vertical Storage and Retrieval Systems save you space and time as against conventional storage systems and time to retrieve your goods • Save you occupied floor space • Saves time in retrieval • Ergonomic retrieval, no bending, stretching or climbing ladders • Protect your goods from damage and theft • Compatible with your IT systems, giving you up to the minute reports of stored goods right at your desk • Backed by Nilkamal's after sales service

LeanLift - Ultimate Storage System

RotoMat Industrial - Optimize Material Handling

RotoMat Office - Efficient files retrieval, frees costly office space

LockoMat - Ideal for costly products and data

HÄNEL AUTOMATED VERTICAL STORAGE AND RETRIEVAL SYSTEMS FROM NILKAMAL

Hänel Lean-Lift®

The Hänel Leanlift is both storage rationalization and goods protection in one : At the center of the cabinet is a computer-controlled positioning lift - called the 'extractor'. In front of it and behind it are the storage shelves. This is where the articles are kept in containers. The storage locations are accessed automatically under electronic control by means of the extractor, which stores or retrieves the requested container. The goods are then delivered to the retrieval area at the correct ergonomic height.

Schematic Drawing :

With the Hänel Lean-Lift® we offer you a first-class, high-tech system for storage organization and materials handling that saves time, storage space and costs, and enables a much more efficient workflow.

OVER 60 % MORE SPACE :

The Hänel Lean-Lift® uses the available room height and stores parts in height-optimized positions so that no space is lost. This produces maximum storage capacity on a minimal footprint. This in turn saves costs and helps to utilize the area dedicated to storage more economically.

WORK TIME SLASHED :

The Hänel Lean-Lift® brings the requested item automatically to the access area in seconds, where it can be retrieved at the optimum ergonomic height. Goods to man is the motto instead of man to goods. Access times are radically reduced and order-picking performance substantially improved.

THE RIGHT DECISION :

If you want to improve your intralogistics and reduce costs, you should talk to our product specialists first. They will work with you to develop your own 'tailor-made intralogistics concept'.

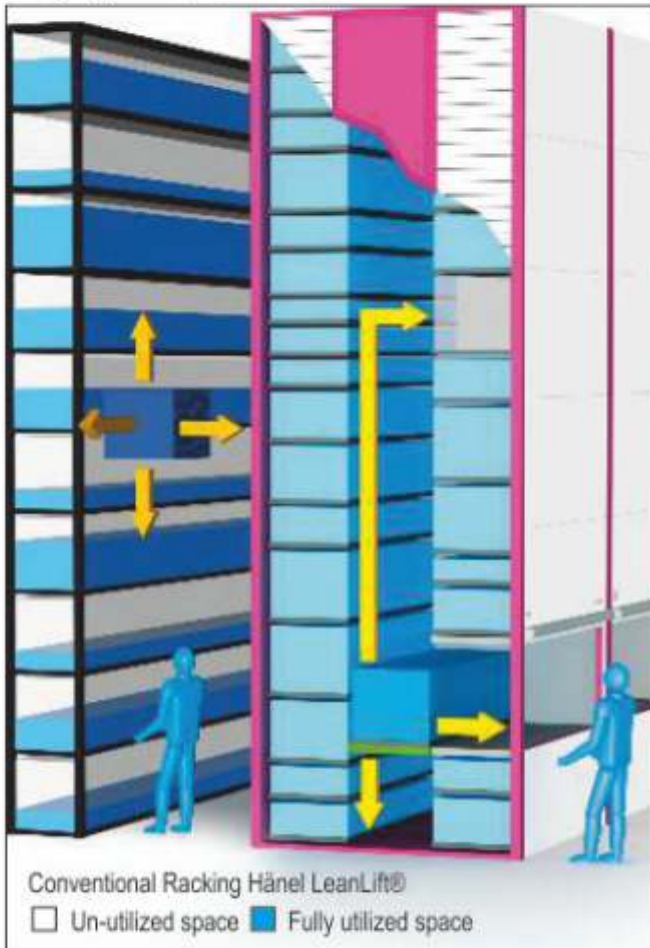

HÄNEL AUTOMATED VERTICAL STORAGE AND RETRIEVAL SYSTEMS FROM NILKAMAL

Distinct advantages over conventional rack storage!

Advantages: Over 60% more storage capacity over conventional racks • Optimum storage of highly varied parts without any loss of space • Storage capacity can be adapted step by step • More than one person at a time can operate the lift and process jobs • Retrieval times reduced • Units can be added, expanded or separated later • Better utilization of storage volume due to height-optimized storage • Decentralized storage right in the production hall.

Accurate height measurement for storing containers in the optimal packing density. Height-measuring light barriers spaced at 25 mm, 37.5 mm, 75 mm, 90 mm or 125 mm. When the container is drawn in, the highly accurate light barriers measure the articles, and the Hänel microprocessor control system finds the optimum storage location in the Hänel Lean-Lift®.

At the same time a protruding goods check is carried out. With its height sensors, profile wall and Hänel container technology, the Hänel Lean-Lift® provides vertical optimization and height optimization in one!

Weigh each container accurately The Hänel Lean-Lift® can be equipped

with an optional electronic 4-point weighing system to weigh each container in the access point without any loss of time. The current weight is then shown on the keyboard display. The weighing device allows the maximum load of the individual containers and that of the entire lift to be recorded. The additional payload is determined with the tare function. Container weight accurately ascertained in the access point with no loss of time thanks to the electronic weighing device

The multi-purpose fold-down support rail

The support rail at the access point can be raised and folded down as required. Storage containers can then be pulled out of the access point on smooth running plastic rollers. This makes work at the Hänel Lean-Lift® even more ergonomic. Heavy parts can

also be removed with a crane.

By aligning a heavy duty trolley, complete containers can be taken out of the Lean-Lift®, with the fold-down support rail. This means that even with particularly heavy parts (up to 1,000 kg per container) the container can be moved easily to the required destination. The Hänel Lean-Lift® can also handle bulky goods like Euro Pallets, engine blocks etc.

The Hänel Multi Function Container

The Hänel Multifunction containers can be customized to handle highly diverse storage articles make highly diverse demands on the container. The containers are configured according to the weight and size of the goods handled, making each Hänel Lean-Lift unique. Hänel Multi-function containers are distortion free for smooth operation.

HÄNEL AUTOMATED VERTICAL STORAGE AND RETRIEVAL SYSTEMS FROM NILKAMAL

The Hänel RotoMat®

The Hänel RotoMat® creates an enormous amount of storage space on a small footprint. It works on the Ferris wheel principle, i. e. the archives come to the operator, not the operator to the archives. The space created on the footprint can be up to 60% more than using a conventional storage system.

RotoMat Operating Principle

The Hänel Rotomat® Industrial Carousel increases your storage efficiency, speeds up access times and facilitates ergonomic material handling. The extra storage capacity generated means a tremendous cost saving for you!

The Hänel Rotomat® Office Carousel filing and records management system makes use of the room height, so its compact design creates more filing capacity. This means expensive office space is freed for more efficient use.

Abbreviations : RWB : Roto Molded Wheeled Bins • WB : Wheeled Bins • L : Litres

ROAD SAFETY PRODUCTS

Welcome to the Road Safety Products from Nilkamal Limited, India's No 1 Organization in Material Handling. These uniquely designed and well engineered barriers, barricades and other traffic movement regulation products facilitate easy handling and are also easy to install or fit. They are manufactured from premium grade UV stabilized virgin polyethylene material. Designed to interlock easily, Nilkamal barricades can readily form a wall. The barriers have been designed to withstand high wind pressure generated by fast moving vehicles and are also more effective, more stable and safer compared to conventional products such as drums, posts and such like used to form temporary barricades. Strips of retro-reflective sheets are also pasted on the barriers to enhance visibility during night.

PERFORATED BARRICADE FENCES :

Model : **RMBPF20041000**

Outside Dimensions : 2020 (L) x 400 (W) x 1265 (H) mm. approx.
